

# Pinephone Pro

Created / Manufactured by  pine64

# It's a linux phone

- Built with Rockchip SOC arm processor
  - (Rockchip RK3399S 64bit SoC – 2x A72 and 4x A53 CPU cores @ 1.5GHz)
- Hardware switches for ultimate privacy!
- Removeable battery
- Pogo pins
- Very cool cutting edge of what an open pocket computer is capable of

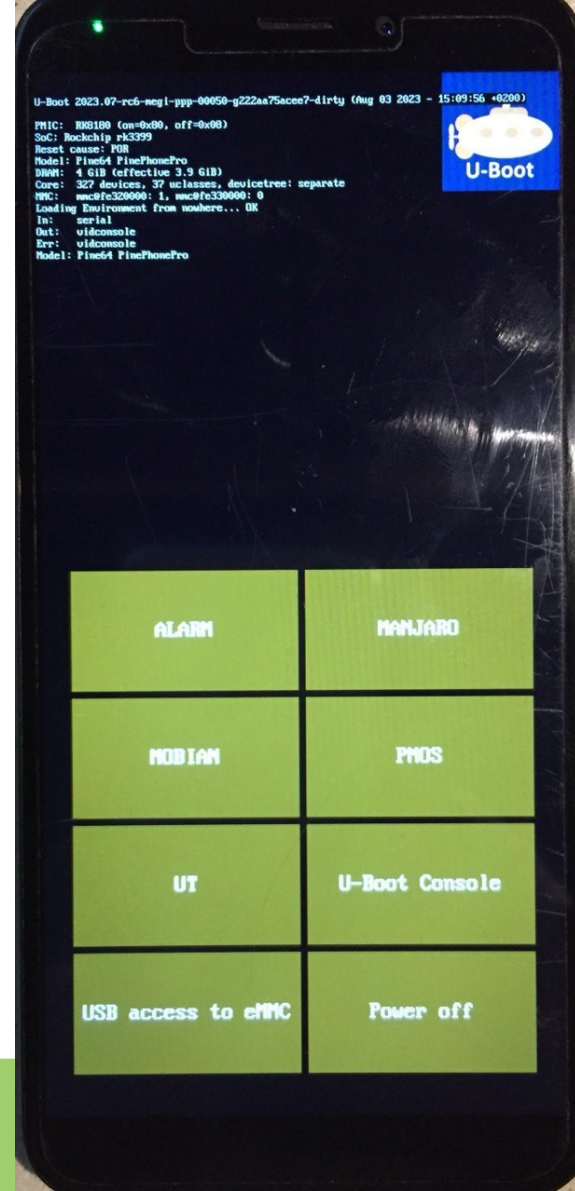

# There are some cons

- Not capable as a daily driver phone
- Requires more support from the community
- It's predecessor is better supported IMHO

# Something new is already here!

- RK2AW bootloader for extreme multiboot on the go
- Not complete list of compatible distros: Arch, deb, manjaro, sailfish, GloDroid (yes it can android) , mobian, ubuntu touch, fedora, LuneOS, kali, postmarketOS, nixOS, Nemo, Rhino linux

Thanks for your time (It's demo time)

Anthony
